

## Main features:

- ★ Simplifies and concentrates indication in control boards and switch boards.
- ★ Complete unit for flush-mounting with standard instrument size 144 x 144, 96 x 96, 72 x 72 mm and a depth of 65 mm.
- ★ Divided into 6, 8 and 20 indication channels.
- ★ Easy change of color on LED by plug-in-system.
- ★ The legend can be typed with a typewriter.
- ★ Quick installation by means of clamping fittings and plug-in terminal block for easy service.
- ★ Contains two integrated push buttons, one for lamp test and one for external use.

## Function:

A connection from N + 1 (terminal number one higher than the total number of the channels) and the terminal with the same number as the channel will light the LED of the appropriate channel.

## Typing:

The frame on the front side is released, and the label between

the two front plates is taken out and taped on a sheet of paper. It is now easy to type the legend with the typewriter.
